We successfully run the smoke test and see the report.
This time, we're gonna try to send this report to others via email.
To do this, if we're using gmail, we must do some security adjustment, otherwise gmail doesn't allow you to send email
Go to your gmail

Google Bill
J
Less secure app access
Some apps and devices use less secure sign-in technologies that make your account vulnerable to attacks. You can turn off access for these apps (we re-commend doing this). If you want to use them despite the risks, you can turn on access. Google automatically turns this feature OFF when not in use.
More information
Allow less secure apps: ON
Click it and make sure it says "ON"

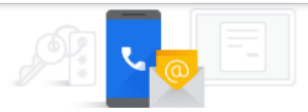
Ways we can use to verify that you are the person making the transaction

This information can be used when we need to make sure it's really you logged in, or if we need to contact you if there's suspicious activity on your account.



recovery phone number — Add mobile number

Recovery email — Add email address

Your devices

You are currently signed in to your Google Account on these devices

windows
Turkey

This device

Find a lost device

Manage devices

Less secure app access

Your account is more vulnerable because you allow apps and devices that use less secure sign-in technology to access your account. To protect the security of your account, Google automatically turns this feature OFF when not in use.

Open

Turn off access (recommended)

Sign in to other sites

Sign in with Google — You do not use your Google Account to sign in to any site or app

Password Manager — You do not have a password saved in your Google Account. Password Manager makes it easier to log in to the sites and apps you use on the devices you're signed in to.
